PROFILE

Software Engineer with 4+ years of experience building and integrating business systems with C#, ASP.NET Core, SQL Server and Epicor ERP. I customize Epicor (BPMs, BAQs, business logic), build .NET services and REST APIs, implement SSO/OAuth 2.0, and integrate ERP with commerce, CRM and accounting platforms such as WooCommerce and Xero. Experienced working remotely with international teams on projects for clients in Australia, Singapore and Pakistan across banking, manufacturing, e-commerce and real estate.

EXPERIENCE

ERP Developer (Epicor)

Nov 2024 — Present

Kairós Solutions · Remote · Australia

- Customize and extend Epicor ERP backends (BPMs, BAQs, business logic) for manufacturing, distribution and food-service clients in Australia and Singapore
- Integrate Epicor with third-party systems through REST APIs to automate workflows across multiple business units
- Build WooCommerce integrations for product catalogues, customer authentication and order processing, kept in sync with ERP data
- Automate WordPress content and operations scripts to remove manual admin work

Software Developer

Jun 2024 — Present

Bahria Town · Lahore

- Build .NET 9 backend systems for a large-scale real-estate platform using Clean Architecture
- Implemented Single Sign-On for secure, centralized authentication across system modules
- Developed plot merging, data filtering and cyclic security workflows, plus modular services for plot management, ownership tracking and reporting
- Processed large volumes of legacy data for the Design Wing and built SQL-based services; deploy to virtual machines
- Integrated third-party tools (e.g. Print Save Track) with international teams

Software Developer

Apr 2023 — Nov 2024

Dukanlay Solutions · Lahore

- Led development and maintenance of ASP.NET Core web applications with Entity Framework and SQL Server
- Built responsive Razor Pages and React front ends that improved platform usability
- Designed data-access layers with the Repository and Unit of Work patterns and dependency injection
- Delivered with a cross-functional Agile team, from requirements to release; contributed to BankMind AI

Freelance Developer

Mid-2022 — Mar 2023

Online projects · Remote

- Built web applications and small software solutions with .NET, C#, Angular and SQL for remote clients

SELECTED PROJECTS

- **Xero Accounting API:** Xero accounting integration over OAuth 2.0 through a .NET service boundary (chart-of-accounts retrieval for finance workflows).
- **BankMind AI:** AI-driven banking product: improved backend performance on large datasets; React + ASP.NET Core UI.

- **Bahria Town Design Wing:** Real-estate backend: plot merging, ownership tracking and reporting modules on .NET 9.

Client work also includes: Galvin (Australia), Caterlink (Australia), C & W Services, United Fasteners (Australia), MIT Semiconductor (Singapore), Orbital UAV (Australia), CRM Project.
